

In July 2020, KHI, was awarded its first HUD grant to fund its permanent supportive housing program. Kirstin's Haven Housing is one of the few wholistic permanent supportive housing, mental health counseling, substance abuse counseling, and supportive program resources in Prince Georges County. The mission is to help individuals improve and maintain healthy, independent lifestyles — ultimately improving their quality of life.

Kirstin's Haven Inc. recognized additional brick and mortar supportive housing as necessary to house the highest need and most vulnerable of the homeless population. The addition of HUD funding has allowed Kirstin's Haven to strengthen supportive services, expand multidisciplinary service teams, and increase housing navigator capacity.

Kirstin's Haven Housing provides permanent supportive housing to residents at our New Carrollton location. Additionally, Kirstin Care, LLC IOP and Psychiatric Rehabilitation Program (PRP) is designed to provide the supportive services through case management for these men and women with substance abuse or co-occurring MH/SA disorders. Those entering treatment at the traditional outpatient level of care will receive individualized attention to begin recovery and learn skills to maintain his or her recovery effort.
